PROFILE

Computer Science graduate with 2.2 years of hands-on experience in Java-based development, backend systems and problem solving. Skilled in building RESTful services, Integrating APIs and end-to-end product development. Possess a strong foundation in data structures, object-oriented design and clean coding practices. Experienced in working in Agile environments and eager to leverage my professional experience to grow as a software engineer.

EDUCATION

Vellore Institute of Technology	2019 - 2024
M.Tech.(Integrated) - Computer Science Engineering ; CGPA : 8.58	
Sri Chaitanya Junior College	2017 - 2019
Intermediate Education ; CGPA : 9.82	

SKILLS

• Languages	Java, Python, SQL
• Frameworks and Libraries	Pandas, Numpy, TestNG, Spring Boot (Basic), Playwright
• Databases	MySQL, SQLite
• Concepts	Data structures and Algorithms, Object Oriented Programming
• Tools & IDEs	Android Studio, IntelliJ IDEA, Jupyter Notebook, Azure DevOps

WORK EXPERIENCE

SDET at UnifyApps December 2024 – Present

Tools and Technologies : Java, Playwright, TestNG, REST Assured, IntelliJ IDEA, MCP

- Designed and maintained Java-based automation frameworks for SaaS integration platform.
- Automated 500+ regression test cases using Playwright and TestNG, improving test efficiency by ~60%.
- Implemented REST API automation using RestAssured(Java) and Playwright API methods.
- Integrated MCP(Model Context Protocol) with AI Agents to auto-generate and execute test cases, reducing manual effort and improving response validation accuracy.
- Collaborated closely with developers to identify, debug, and resolve critical platform issues before release.

Android Developer Intern at Philips August 2023 – August 2024

Tools and Technologies : Android Studio, Android SDK, Java, XML, RESTful APIs, SQLite, Vysor, Microsoft Azure

- Contributed to Lumify Android application, working on production-level features in an Agile environment.
- Integrated RESTful APIs with backend services, ensuring efficient data flow and reliable communication between client and server.
- Migrated legacy Android libraries to newer versions while ensuring application stability.
- Developed contact management features including contact listing, search functionality, profile retrieval, friend requests and notifications.
- Utilized Microsoft Azure for task tracking, sprint planning and code reviews.

PROJECTS

Student Attendance using Face Recognition

Tools and Technologies : Python, OpenCV, NumPy, Image processing, Jupyter Notebook

- Designed a face recognition system to identify students and match faces with registered profiles.
- Automated attendance marking upon successful recognition and provided audio feedback to confirm the result.
- Used image processing and face recognition to ensure reliable identification under varying lightning conditions.

AI-Based Recruiter

Tools and Technologies : Django, Python, NumPy, SpeechRecognition, OpenCV

- Developed a mobile application to analyze resumes and shortlist candidates automatically.
- Implemented speech recognition-based confidence analysis and emotion detection during interview simulations.
- Built backend services in Django for candidate processing, scoring and ranking.

IPL Match Ticket Booking System

Tools and Technologies : React js, LoopBack (Node js framework)

- Created a website for booking IPL match tickets online with match details and seat selection.
- Configured backend APIs with LoopBack to handle ticket availability and booking transactions.
- Designed a dynamic frontend using ReactJs to provide seamless and user-friendly booking experience.

CERTIFICATES

Convolutional Neural Networks - Coursera (DeepLearning.AI, Non-Credit) - [Certificate](#)
